

# AiroPure®

[www.probeindustries.co.uk](http://www.probeindustries.co.uk)

Unique odour kill technology  
Independently verified  
Reduces risk of Legionella

Please note: To reduce the risk of Legionella use at minimum concentrations of 150:1 with water. Always read the label and product information before use.

## AiroPure®

### Main advantages

- ▶ Unique scientifically proven odour elimination technology
- ▶ Comprehensive toxicology assessment by independent specialists
- ▶ Cytotoxicity testing to ensure not irritant to skin
- ▶ Legionella and bacteria kill reports from NHS and Eurofins laboratories

We manufacture it at our facility in Northumberland.

A patented odour neutraliser and dust control product which represents a radical step-change in odour control.

This unique technology firstly encapsulates odour and dust particulates in the atmosphere. Once captured odour compounds are broken down at a molecular level destroying them completely.

AiroPure® has been independently evaluated against competing products, and tested and certified in specialist laboratories around the world. Effective against a wide spectrum of organic odours including hydrogen sulphide, ammonia, mercaptans, amines and many more. Also proven to inhibit the growth of Legionella in misting systems providing ultimate peace of mind. Full test data available on request.
